

Brand Guidelines

Brand Overview

ChordOpus is a modern digital platform that reimagines the way musicians explore harmony. By combining elegant design with intelligent technology, it transforms complex musical concepts into intuitive, engaging experiences. Rooted in clarity, creativity, and craftsmanship, the brand empowers guitarists and music enthusiasts to discover, learn, and create with confidence through a refined and thoughtfully designed interface.

Mission

To empower musicians with intuitive tools that simplify the exploration of harmony, inspire creativity, and make learning music more engaging through thoughtful design and intelligent technology.

Vision

To become the reference platform for modern musical exploration, where creativity, education, and technology come together to help every musician grow with confidence.

Core Values

Clarity

Every interaction is designed to be intuitive and purposeful.

Creativity

Exploration and experimentation are at the heart of the experience.

Craftsmanship

Attention to detail defines both the product and the brand.

Accessibility

Powerful musical concepts should be approachable to musicians of every level.

Brand Guidelines

Light Theme

The ChordOpus color system is designed to balance creativity with clarity. A refined teal establishes the brand identity, while a complementary blue supports interactive elements and navigation. Neutral tones provide structure and readability across both light and dark themes, and semantic colors communicate system feedback consistently. Together, these colors create an interface that feels modern, expressive, and focused on the musical experience.

The light theme emphasizes clarity, openness, and focus. Warm neutral backgrounds, balanced contrast, and carefully selected brand colors create an inviting environment that encourages exploration while maintaining excellent readability across the interface.

Dark Theme

The dark theme is crafted for immersive and comfortable viewing, particularly during extended creative sessions. Rich surfaces, refined contrast, and vibrant accent colors preserve visual hierarchy while reducing distractions, allowing the content and interactions to remain the center of attention.

Primary Font: General Sans

General Sans serves as the primary typeface of ChordOpus. Its contemporary geometric forms convey confidence, precision, and clarity, making it ideal for headings, navigation, interface elements, and musical notation. It establishes a strong visual identity while remaining clean and highly legible.

Secondary Font: Satoshi

Satoshi is the secondary typeface, chosen for its exceptional readability and balanced proportions. It is used for body text, supporting content, and interface descriptions, providing a comfortable reading experience while complementing the distinctive character of General Sans. It reinforces the platform's minimalist and approachable aesthetic.

Satoshi: Body Text & UI

Body Text

Size: 17px • Leading: 1.6 • Regular (400)

ChordOpus is a modern platform for exploring the language of music through elegant, intuitive tools designed for guitarists and music enthusiasts. It empowers users to discover chords, voicings, and harmonic relationships while making complex musical concepts feel approachable and inspiring. Every aspect of the experience is guided by clarity, refinement, and creativity, allowing musicians to focus on expression rather than technology. Built on a foundation of thoughtful design and intelligent engineering, ChordOpus transforms the exploration of harmony into a seamless, enjoyable, and visually engaging experience.

Small Body Text

Size: 15px • Leading: 1.2 • Regular (400)

Small body text is used for supporting information that complements the primary content without competing for attention. It is ideal for helper text, captions, metadata, explanatory notes, and contextual guidance throughout the interface.

Iconography

Icons in ChordOpus are designed to communicate with clarity and consistency. Built on a clean, minimalist style, they enhance navigation and reinforce functionality without distracting from the content. A unified visual language—including consistent stroke weight, proportions, and geometry—ensures that every icon feels familiar, recognizable, and seamlessly integrated into the overall brand experience.

Music

Actions

System

Imagery

Imagery in ChordOpus should reflect the brand's creative and musical character while maintaining a clean, refined visual language. Images should feel authentic, intentional, and immersive, capturing the process of exploring, learning, and creating music. The visual direction should complement the interface rather than compete with it, using imagery to add personality and emotional depth while preserving the sense of clarity and craftsmanship at the heart of the brand.

Authentic

Favor natural, candid-looking imagery over overly staged, generic, or commercially posed photography.

Focused

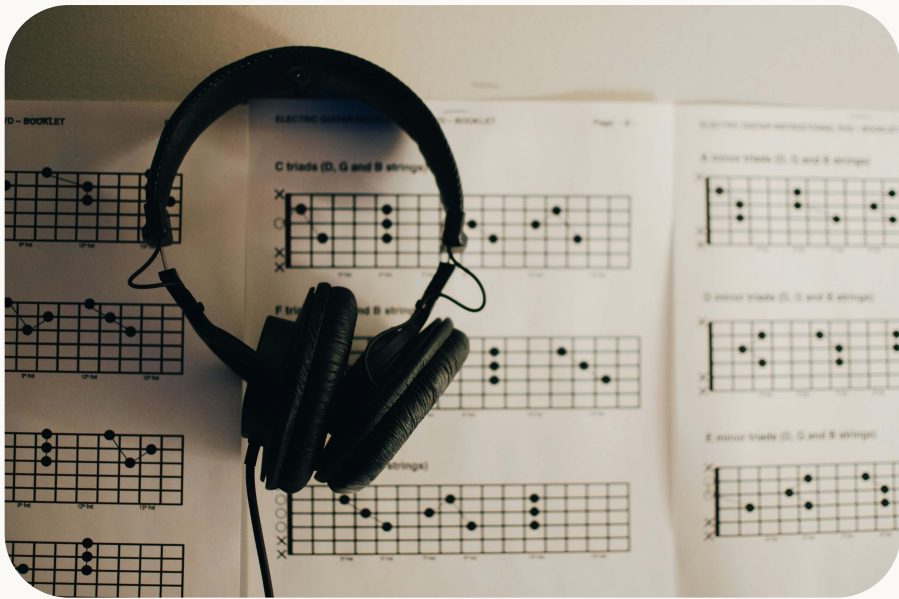

Subjects and compositions should have a clear visual point.

Artistic

Imagery can have personality and atmosphere without becoming overly decorative.

Clean

Avoid visually noisy compositions that compete with the interface.

Buttons & Form Elements

Buttons

Buttons are designed to provide clear, purposeful actions while maintaining the clean and refined character of ChordOpus. Primary actions should have strong visual presence, while secondary actions remain understated but clearly identifiable. Consistent typography, spacing, shape, and interaction states ensure that buttons feel cohesive throughout the platform.

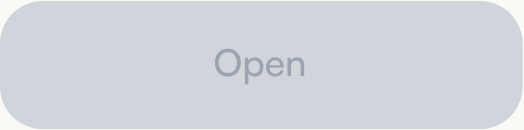

Primary

Secondary

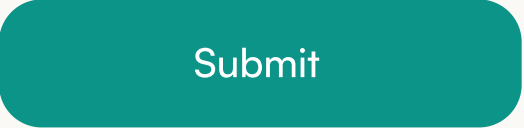

Disabled

Form Elements

Form elements should make input and configuration feel simple and intuitive. Inputs, selects, toggles, and other controls should use consistent dimensions, typography, borders, and spacing, with clear visual states that help users understand when an element is available, focused, selected, or disabled.

Cards & Surfaces

Cards and surfaces provide structure for related content without introducing unnecessary visual complexity. They should use the established color, spacing, typography, and shape system to create clear layers of information while preserving the open and uncluttered character of the interface.

Navigation & Feedback

Navigation

Navigation components should provide a clear and unobtrusive way to move through ChordOpus. Their visual treatment should establish a strong hierarchy between default and active states while remaining consistent with the platform's minimal and focused aesthetic.

-  Home
-  Explore Chords
-  Library
-  Progressions
-  Saved Chords

Feedback

Feedback components communicate important system information clearly and consistently. Success, warning, error, and informational states should use the established semantic colors alongside appropriate typography and visual hierarchy, allowing users to understand the result or status of an action at a glance.
